pH	12.5-13.5
Fragrance	Mild solvent odor
Biodegradable	Completely
Color	Clear, straw
Flammable	No
Stability	One year, minimum
Specific Gravity	1.051

Packaging 4x1 gallon case
5-gallon pail

A new generation non-ammoniated stripper, MagnumTM is designed to remove floor finishes and seals even after repeated high speed burnishing has been applied. This is a highly effective product with an excellent track record. Magnum has extremely mild odor and is fast acting. For best results*, apply diluted product to the floor surface and allow to work for five to ten minutes. Then agitate with machine or mop. Remove residue with a wet vac and thoroughly rinse the floor with clear water, then dry before application of new seal, or floor finish. This stripper may be used at dilutions of 1 to 10 with a floor machine and pad application. For mop-on, mop-off application, dilute at 1 to 4.

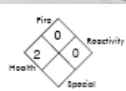

**Use appropriate PPE. Your PUR-O-ZONE representative can advise you. Read label instructions.*
