

Sani-SorbTM

Vomit Absorbent

Quick containment of emesis (vomit) and the associated odor is easy with Sani-SorbTM. Comes in a handy wide-mouth shaker bottle with handle for applying exactly where you want it.

Sani-Sorb's deodorizing action helps contain unpleasant odor. Simply pour over the spill, then allow to stand while the granules contain and absorb the material. Then sweep into a dustpan and red bag the absorbed contents. Clean and sanitize the area as needed wearing appropriate PPE (personal protective equipment) for the health risk being addressed.

Use Sani-Sorb for all organic spills. Keep containers handy in utility closets for fast access.

* Decontaminate brooms, pans and tools after use with a cleaner and disinfectant.
