

# INTEGRA®

## Green Cleaning For School FoodService Programs

## **INTEGRA® GREEN™ Products**

The INTEGRA® TIP® Laundry Program (Total Impact Program) was created in December of 1997 and received the EPA's first Design for the Environment Institutional Laundry Program partnership. Since that time we have worked to maintain that program while adding additional cleaning products in the past several years.

The Design for the Environment program paved the way for new green endorsements through the creation of the CleanGredients and Blue Green organizations. Anderson Chemical Company continues to work with these organizations to provide new and improved green chemistry. We pride ourselves as a leader in the manufacturing of low toxicity products.

**ADVANTAGES...** INTEGRA® Green™ products are formulated with effective environmentally preferable chemistry. The result is safer products for you and safer products for the environment.

**SAFETY...** INTEGRA® Green™'s safer chemistry will positively impact your company.

- INTEGRA® Green™ products must meet rigorous evaluation and testing.
- INTEGRA® Green™ products provide less hazardous materials for your personnel.
- INTEGRA® Green™ products will carry lower-to-no hazardous ingredient labeling with reduced-to-no hazards for warehousing and DOT shipping and handling invoices.
- And last, but certainly not least, INTEGRA® Green™ products provide a positive environmental impact as their work is completed and they travel downstream. Federal, state, and local regulators are becoming increasingly restrictive in the type of effluents that are allowable. They are joining the millions in the private sector who want to maintain, or reclaim, healthy streams, rivers, lakes and air.

**FUTURE...** More and more customers are looking for environmentally preferable products. Hospitality, schools, healthcare and other public and private facilities want to show their clients that they are doing their part to protect and preserve the environment. Government regulators are demanding safer products for employees and the environment. The time is now, the products are **INTEGRA® Green™!**

## Proven Solutions

- Our products and systems are people and environmentally safe.
- Super concentrated products keep your cafeteria clean & safe.
- Effective training programs.
- Improved productivity.
- Database management services.
- Prompt professional emergency service.

## Reliability / Innovation / Quality

Anderson Chemical has applied 98 years of experience into creating the most comprehensive chemical and equipment programs in our industry today. From our earth friendly solutions, together with our reliable delivery systems and standardized cleaning processes, you can rely on us for total solutions at a competitive price.

While all facilities are different, **INTEGRA**® has a system that is right for you!

## GREEN Warewashing Products

**BIO CLEAN**  
Enzyme Floor  
Cleaner

**DISSOLVE**  
Non-Corrosive Lime  
Scale Remover
