Beyond eco-friendly

Beyond is not only where we end up, it's where we start. Since its foundation in 1987, Technical Concepts have always reached beyond, looking for new ways to automate the washroom, new ways to make washroom cleaner and hygiene better around the world.

At Technical Concepts, we believe that preservation of natural resources can be achieved cost-effectively. And in a sustainable manner. Our products help to conserve water and energy. And we are continuously evaluating options to further reduce packaging material and utilize new better recyclable components. Our proprietary innovative technologies enable accurate metered dosing of biodegradable formulations.

At Technical Concepts, we reach. Beyond.
